

The 12th cohort of the Moove Lab joins Station F!

On April 29th, the Moove Lab jury (the first mobility startup accelerator in France, established in 2017 by Mobilians and Via ID) selected the startups for its 12th cohort from over 100 applications! In addition to Via ID and Mobilians, the jury included representatives from BMW Group France, Bee2Link, BCA Expertise, Bessé, EDF, NextMove, ANFA, OPCO Mobilités, Opteven, Roole, and EIT Urban Mobility.

A glimpse of the new cohort

Here is the list of the startups in the new cohort, officially announced on May 15th:

- [AlloBrain](#): Helps brands streamline customer service using voice recognition and generative AI.
- [Casawatt](#): Offers software for companies to automatically certify home charging done by their employees.
- [Cyclink](#): Reconditions and repairs electric bikes.
- [Guided Energy](#): Assists fleet managers in transitioning to electric vehicles.
- [Jool](#): Provides a rental service for 100% electric, shared, and connected cars.
- [Liebr](#): Offers on-demand, on-site maintenance services for electric vehicles.
- [Lormauto](#): Manufactures retrofitted, sustainable electric vehicles made in France.
- [Midipile](#): The only truly circular car manufacturer.
- [Moovance](#): An app that promotes cleaner and safer mobility by measuring the carbon footprint of trips and rewarding eco-friendly travel.
- [N-VIBE](#): The first vibrating GPS for the blind and visually impaired.
- [Sarus](#): Enables companies handling sensitive data to complete their projects faster and in full compliance with its advanced privacy protection platform.
- [uMotion](#): Creates the most sustainable and affordable delivery vans in the world.
- [Valused](#): Distributes second-life (reconditioned and remanufactured) automotive parts to repair professionals.
- [Mondaycar](#): The French pioneer of neoleasing! Offers vehicles, fleet management, and SaaS solutions without commitment, delivered in one week.

The solutions offered by these 15 new startups

The solutions showcased by these startups reflect the diversity and innovation within the sector, aligning with the trends highlighted in the February 2024 [French Mobility Startup Observatory](#): intermediate and micro-vehicles, electrification of mobility, circular economy, and impact, data and AI.

Since joining the program on Wednesday, May 15th, the selected startups have benefited from personalized support, business opportunities, collaborations with leading partners, workspaces at Station F—the world's largest startup campus—and exclusive access to our network for six months.

Welcome to these new startups!
